

FAQs to RFP: Toolkit for Stakeholder Engagement in Transmission Planning

Question: Submission deadline of Monday, September 18: by what time and in what time zone?

Answer: 5:00 p.m. ET on Monday, September 18, 2023

Question: Could NASEO provide a target budget for this project?

Answer: We cannot provide more specifics on the budget. We ask that offerors provide budget to the best of their ability, based on similar or related work products you may have done previously.

Question: Would you be interested in learning the cost associated with more robust content/materials for the toolkit or would you like us to keep the scope to what is limited in the RFP?

Answer: We ask that you please fashion your proposal according to the scope as outlined in the RFP.

Question: Under the “Responding to the RFP section,” the RFP requests a “Description of relevant experience including prior work on ***energy storage policy and planning*** as well as working with relevant state agencies (in particular with State Energy Offices).”

Answer: That language is a typo - an inadvertent carryover from a previous RFP solicitation. That should read “Description of relevant experience including prior work on ***energy policy and planning*** as well as working with relevant state agencies (in particular with State Energy Offices).”
